

Comprehensive Safeguarding For Your Business

Solace Cyber Secure

Today, there exists a variety of cyber threats, each necessitating unique defensive measures. Take a proactive stance with a cyber security package designed to safeguard your business and offer 24/7/365 protection from our UK-based Security Operations Centre (SOC).

Secure your business from every angle

The Solace Cyber Secure package is an ideal introduction to our services and covers the minimum recommended requirement for cyber risk mitigation and includes:

Digital Forensics & Incident Response Team Access

Our expert Incident Response Teams swiftly use advanced digital forensics to detect, analyse, and counteract cyber threats, safeguarding your business.

Cyber Risk Assessment

Solace Cyber assess and provide a risk percentage score, aiding in understanding and prioritising cyber risks for an effective remediation plan.

Managed Detection & Response 24x7 SOC Service

Our 24/7 Managed Detection and Response (MDR) service monitors, detects, investigates, and responds to security threats for your organisation.

EndPoint Detection & Response License

The EDR license provides access to cybersecurity tools that monitor and respond to threats on individual endpoints and network devices.

ASSURANCE

Each security component seamlessly integrates for a confident posture.

AFFORDABLE

Reduce expenditure by purchasing cyber security components as a package.

SCALABLE

Adapt to changing security requirements as your business grows and threats evolve.

SOLACE SECURE INCLUDES

(cont...)

Real-time Risk Platform Access

The platform offers a unified system for real-time monitoring of cyber threats impacting your business, catering to executives and IT professionals.

Solace Security Advocate

A Cyber Security Advocate safeguards digital assets by implementing purchased security measures in alignment with business policies and protocols for protection.

Threat Intelligence Module

Our threat intelligence module collects data from diverse sources, offering actionable insights on potential threats for proactive organisational security measures.

Microsoft 365 Health Check

Solace Cyber's Microsoft 365 Health Check assesses your configuration, providing a summary, score, and detailed recommendations for security hardening.

Cyber security doesn't need to be complicated

All of Solace Cyber's managed security solutions are delivered from the same service ecosystem and utilise a common set of service elements:

-  **24/7 Incident Response**
-  **Unlimited Service Requests (within parameters)**
-  **Service Level Agreement**
-  **Security Patching (for managed assets)**

-  **Proactive Maintenance & Recurring Service Tickets**
-  **Service Reporting**
-  **Solace Security Advocate (risk manager, service delivery)**
