

# Strengthen Your Business with Enhanced Cyber Protection

## Solace Cyber Secure PLUS

Today, there exists a variety of cyber threats, each necessitating unique defensive measures. Take a proactive stance with a cyber security package designed to safeguard your business and offer 24/7/365 protection from our UK-based Security Operations Centre (SOC).

### Secure your business from every angle

The Solace Cyber Secure PLUS package includes the essential services required for effective cyber risk mitigation, along with several enhancements that fortify your security. The package includes:

#### Digital Forensics & Incident Response Team Access

Our expert Incident Response Teams swiftly use advanced digital forensics to detect, analyse, and counteract cyber threats, safeguarding your business.

#### Cyber Risk Assessment

Solace Cyber assess and provide a risk percentage score, aiding in understanding and prioritising cyber risks for an effective remediation plan.

#### Real-time Risk Platform Access

The platform offers a unified system for real-time monitoring of cyber threats impacting your business, catering to executives and IT professionals.

#### Threat Intelligence Module

Our threat intelligence module collects data from diverse sources, offering actionable insights on potential threats for proactive organisational security measures.

#### Managed Detection & Response 24x7 SOC Service

Our 24/7 Managed Detection and Response (MDR) service monitors, detects, investigates, and responds to security threats for your organisation.

#### EndPoint Detection & Response License

The EDR license provides access to cybersecurity tools that monitor and respond to threats on individual endpoints and network devices.

#### Solace Security Advocate

A Cyber Security Advocate safeguards digital assets by implementing purchased security measures in alignment with business policies and protocols for protection.

#### Microsoft 365 Health Check

Solace Cyber's Microsoft 365 Health Check assesses your configuration, providing a summary, score, and detailed recommendations for security hardening.

ASSURANCE

Each security component seamlessly integrates for a confident posture.

AFFORDABLE

Reduce expenditure by purchasing cyber security components as a package.

SCALABLE

Adapt to changing security requirements as your business grows and threats evolve.

## SOLACE SECURE PLUS INCLUDES (cont...)

### Virtual CISO (vCISO)

Our vCISO offers crucial leadership, guiding and managing risks and threats to protect your organisation's data. As an external advisor, unbiased feedback is guaranteed.

### Solace University

Solace Cyber University offers extensive cyber security training, providing actionable data to embed secure behaviours as second nature for all employees.

### External Vulnerability Assessment

A monthly external vulnerability assessment that offers visibility of prominent vulnerabilities, giving you time for remediation before they are exploited.

### Cloud XDR

Developed in-house with advanced AI and machine learning, Cloud XDR swiftly detects and responds to malicious activity, preventing business damage.

## Cyber security doesn't need to be complicated

All of Solace Cyber's managed security solutions are delivered from the same service ecosystem and utilise a common set of service elements:

 <b>24/7 Incident Response</b>	 <b>Proactive Maintenance &amp; Recurring Service Tickets</b>
 <b>Unlimited Service Requests (within parameters)</b>	 <b>Service Reporting</b>
 <b>Service Level Agreement</b>	 <b>Solace Security Advocate (risk manager, service delivery)</b>
 <b>Security Patching (for managed assets)</b>
